

What is claimed is:

1. A method for scheduling an event over a network in a calendar of an invitee, the event having a set of details provided by an event creator, the
5 method comprising:
 - creating a schedule request including at least the set of details and an identifier for the event creator;
 - sending the schedule request to a server in communication with the network, the server having access to the calendar of the invitee and a calendar for
10 the event creator;
 - creating an event record at the server, the event record including at least the set of details and a link to the calendar of the invitee; and
 - adding the event to the invitee's calendar.
- 15 2. A method according to claim 1, further including:
 - creating a link from the event record to the event creator's calendar; and
 - adding the event to the event creator's calendar.
3. A method according to claim 1, wherein the network is the Internet.
- 20 4. A method according to claim 2, wherein the invitee's calendar, the event creator's calendar and the event record are stored in a database in communication with the server.
- 25 5. A method according to claim 1, wherein the schedule request is a hypertext transfer protocol request.
6. A method according to claim 1, wherein the invitee's calendar is part of a personal information management system.
- 30 7. A method according to claim 1, wherein the event creator changes at least

one member of the set of details for the event, the method further including:
updating the event record with the changed set of details; and
updating the event in the invitee's calendar with the changed set of details
using the link between the event record and the invitee's calendar.

5

8. A method according to claim 7, further including sending a notification
message to the invitee including the changed set of details.

9. A method according to claim 1, wherein the schedule request is created
10 using a link associated with the event.

10. A system for scheduling an event over a network in a calendar of an
invitee, the event having a set of details provided by an event creator, the system
comprising:

15 a first link, inserted in a content site associated with the event creator and
including the event, that when selected creates a schedule request including at
least the set of details for the event and an identifier for the event creator, the
schedule request directing the event to the invitee's calendar;

a least one server, in communication with the network, to receive the
20 schedule request and store the event in the invitee's calendar and in an event
record that includes a second link to the invitee's calendar; and

at least one database, in communication with the server, to store the event
record.

25 11. A system according to claim 10, wherein the schedule request is a
hypertext transfer protocol request.

12. A system according to claim 10, wherein the event is stored in a calendar
for the event creator.

30

13. A system according to claim 10, wherein the content site is a Web page on

the World Wide Web.

14. A computer program product for use on a computer system for scheduling an event over a network in a calendar of an invitee, the event having
5 a set of details provided by an event creator, the computer program product comprising a computer useable medium having computer readable code thereon, the computer readable program code including:
- program code for creating a schedule request including at least the set of details and an identifier for the event creator;
 - 10 program code for sending the schedule request to a server in communication with the network, the server having access to the calendar of the invitee and a calendar for the event creator;
 - program code for creating an event record at the server, the event record including at least the set of details and a link to the calendar of the invitee; and
 - 15 program code for adding the event to the invitee's calendar.
15. A computer program product according to claim 14, wherein the schedule request is a hypertext transfer protocol request.
- 20 16. A computer program product according to claim 14, further including:
- program code for creating a link from the event record to the event creator's calendar; and
 - program code for adding the event to the event creator's calendar.
- 25 17. A computer program product according to claim 14, wherein the vent creator changes at least one member of the set of details, the computer program product further including:
- program code for updating the event record with the changed set of details; and
 - 30 program code for updating the event in the invitee's calendar with the changed set of details using the link between the event record and the invitee's

calendar

18. A computer program product according to claim 17, further including
program code for sending a notification message to the invitee including the
5 changed set of details.
